

## feature school: lalor north primary school

Our feature school for September 2009 is Lalor North Primary School. The pupils at Lalor North Primary School have been enjoying the benefits of Solcare sunglasses for more than 2 years! This year the school provided all prep students with Solcare sunglasses. All students at the school are encouraged to wear their sunglasses at school.

## funding announced for skin cancer prevention

One million dollars in new funding announced this for a skin cancer prevention campaign in Victoria has been welcomed by Cancer Council Victoria, as volunteers work tirelessly throughout the state on Daffodil Day.

Cancer Council Victoria's Director of Community Relations and fundraising, Deb Stringer, said the Victorian Government has agreed to fund a new SunSmart campaign targeting young people.

"The funding will provide a huge boost to Cancer Council Victoria's work to minimize the human cost of skin cancer through the SunSmart program," Ms Stringer said.

## did you know?

UV radiation levels are already rising so don't wait until summer to use sun protection.

Throughout Australia from September through to the end of April average UV levels are 3 and above, which is when UV radiation can damage skin and eyes.

Cancer Council Australia recommends that children wear sunglasses to protect their eyes from harmful UV radiation.

SunSmart has tips for choosing and using sunglasses well. Check out their website at: [http://www.sunsmart.com.au/sun\\_protection/slide/](http://www.sunsmart.com.au/sun_protection/slide/)
